EPA's e-Manifest system is currently live and open for nationwide user registration!

In addition to generators and transporters, e-Manifest will apply wherever there is a requirement under either state or federal law to use the RCRA manifest for a VSQG/CESQG

waste shipment. (See Nov 9 update.)

Recognized for Exceeding OSHA Requirements

Veolia's Schenectady, NY location is proud to receive OSHA's Voluntary Protection Programs (VPP) certification this month. Awarded to employers who implement effective safety practices and health management systems that exceed basic compliance, this certification symbolizes Veolia Schenectady's long commitment to ensuring that staff stay safe on site.

"This certification highlights the importance and emphasis Veolia places on the health and safety of our employees, customers and the communities in which we operate," said Bob Cappadona, Veolia North America President and COO, ESS.

Veolia vs. Ocean Pollution

Veolia is well aware of the importance of our oceans and how this resource is sometimes mishandled: 50% of our oxygen comes from the ocean, but 80% of pollution in the oceans comes from the land. The ocean absorbs 1/3 of our carbon dioxide emissions and receives 50% of our wastewater in return.

To help our oceans return to an acceptable condition, Veolia is committed to a three point solution: treating coastlines, preventing further pollution, and transforming production and consumption to reduce waste.

We Offer Environmental Staffing and Onsite Services

We provide of a wide variety of hazardous and regulated waste management solutions to help industries improve compliance, reduce cost, minimize waste and streamline facility operations. Our field personnel will work alongside your employees on a full-time, part-time, or as-needed basis to support your needs, including:

- Developing staff and administering cost-effective onsite waste management recycling programs
- Packaging, tracking, manifesting, transporting and disposing of your organization's hazardous waste, regulated waste and recyclable materials
- Providing regulatory, safety and technical support to your operations

Featured Branch

- **CHARLESTOWN, MA**
- **TONAWANDA, NY**
- **NEWINGTON, CT**

Regulatory Updates

- The EPA made several revisions to the electronic manifest (e-Manifest) system.
- A final rule (83 FR 38262-39263) was published by the EPA to change the address where paper documents must be mailed for the importation and exportation of hazardous wastes and conditionally excluded cathode ray tubes.
